GDS Manager User Manual
Version 1.0.0.109

DOCUMENT PURPOSE

This document describes the basic concept and tasks necessary to use and configure your GDS Manager. In addition, it covers the topic of connecting and configuring the GDS Manager with the GDS3710.

Please visit http://www.grandstream.com/support to download the latest "GDS Manager User Manual".

This guide covers following topics:

- Welcome
- Getting to Know GDS Manager
- GDS Manager Applications
- Experiencing the GDS Manager

CHANGE LOG

This section documents significant changes from previous versions of user manual for GDS Manager. Only major new features or major document updates are listed here. Minor updates for corrections or editing are not documented here.

Software Version 1.0.0.109

- Added Private Door Password Configuration Field in Member Management. [Private Door Password]
- Increased the Log Operation Types [Device Log]
- Added sorting function based on time in administrator logs [Administrator Log]
- Added SIP mode to display the IP/Port for peering calls in the visiting logs and call logs. [Device Log]

Software Version 1.0.0.98

- Added schedule batch modification option. [Schedule]
- Added SMTP support to GDSManager. [SMTP Server Information]
- Added option to select windows numbers to display when started.
- Added "Delete All" option in device configuration page. [Configuration]
- Regulated the maximum number of group to 50. [Group]
- Added keypad input error alarm under device log. [Device Log]
- Added manually configured email reporting function. [Report List]
- Updated UI Resource.
- Added GSDServer should display first when program initialized or launched.
- Added Record Server allowing configuration of the storage paths. [Starting GDS Server]
- Added "check box" in front of the search list of the device. [Search]
- Added prompted message of "Open Door Successfully" in the preview screen when door opened. [Realtime Video]
- Added Open Door feature. [Realtime Video]

Software Version 1.0.0.75

- This is the initial version for the GDS Manager.

WELCOME

Thank you for purchasing Grandstream's GDS3710 Hemispheric HD IP Video Door System, an innovative IP based powerful video door system.

GDS3710 HD IP Video Door System is a hemispheric IP video door phone and a high-definition IP surveillance. GDS3710 is ideal for monitoring from wall to wall without blind spots. Powered by an advanced Image Sensor Processor (ISP) and state of the art image algorithms, it delivers exceptional performance in all lighting conditions. The GDS3710 IP video door system features industry-leading SIP/VoIP for 2-way audio and video streaming to smart phones and SIP phones. It contains integrated PoE, LEDs, HD loudspeaker, RFID card reader, motion detector, lighting control switch and more.

GDS3710 HD IP Video Door System can be managed by Grandstream's free window based management software: GDS Manager Software, a client/server based software, which provides RFID card management and basic reports for the door entrance.

Along with Grandstream videophone, mobile Apps, and Network Video Recorder (NVR), the GDS3710 provides a powerful recording and monitoring solution. It can be managed with GSURF Pro or any ONVIF-compliant video management system. It also offers a flexible HTTP API for easy integration with 3rd party applications and other surveillance systems.

GDS3710 is ideal for entry places required wide angle monitoring, such as banks, hotels, schools, office building, retail stores and small warehouses, also good for small to median sized enclosed environments.

GETTING TO KNOW GDS MANAGER

The GDS Manager is a management software for the GDS3710 based on a Server/Client architecture, providing RFID card management, basic reports for door entrance and attendance management.

The GDS Manager is a client–server model, which is a distributed application structure that partitions tasks or workloads between the providers of a resource or service, called **Server**, and service requesters, called **Client**.

Often clients and servers communicate over a computer network on separate hardware, but both client and server may reside in the same system. A server host runs one or more server programs that share their resources with clients. A client does not share any of its resources, but requests a server's content or service function.

Clients therefore initiate communication sessions with servers that await incoming requests. Examples of computer applications that use the client–server model are Email, network printing, and the World Wide Web.

Installation Guide

Minimum Computer System Requirement

<u>Server:</u>
- **Operating System:** Windows 2003/2008 Server; Windows XP SP2/SP3; Windows 7 32bit/64bit
- **Processor:** Intel® Core™ i3; 2.6GHz or above recommended
- **Memory Capacity (RAM):** 4GB or above
- **Hard Drive Capacity:** 320G (depending on video recording requirement)
- **Graphics Card Type:** Discrete Graphics Card (nVIDIA GEFORCE® GTX660 or above recommended)
- **Network Adapter:** 1000Mbps network adapter

<u>Clients:</u>
- **Operating System:** Windows XP SP2/SP3; Windows Vista; Windows 7 32bit/64bit; Windows 8
- **Processor:** Intel® Core 2 Duo ™ or above
- **Memory Capacity (RAM):** 2GB or above
- **Hard Drive Capacity:** 120G (depending on recording requirement)
- **Graphics Card Type:** Discrete Graphics Card recommended
- **Network Adapter:** 100Mbps network adapter, 1000Mbps recommended

Note: UPS is required for SERVER to prevent database or video record file corruption caused by power outage.

Download and Install GDS Manager

Users need to download the GDS Manager from the following link:

http://www.grandstream.com/sites/default/files/Resources/gdsmanager.zip

1. Click on to start installing the GDS Manager.

2. Follow instructions to complete the installation.

3. After installation is successful, the following icons will be shown on the Desktop:

 GDSServer   GDSManager

.

Connecting to the GDS Manager

Starting GDS Server

Double click on the GDS Server icon to start listening for new client connections. The following icon will be shown on the taskbar , right click on to bring the server options as shown below.

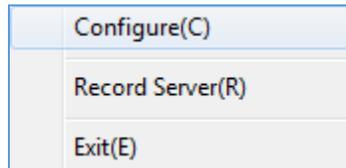

Figure 1: GDS Server Options

1. **Configure**: Click to display a window showing Listening IP and Port of the server as well as an option to start the server with the operating system and a button for starting the record server as shown below:
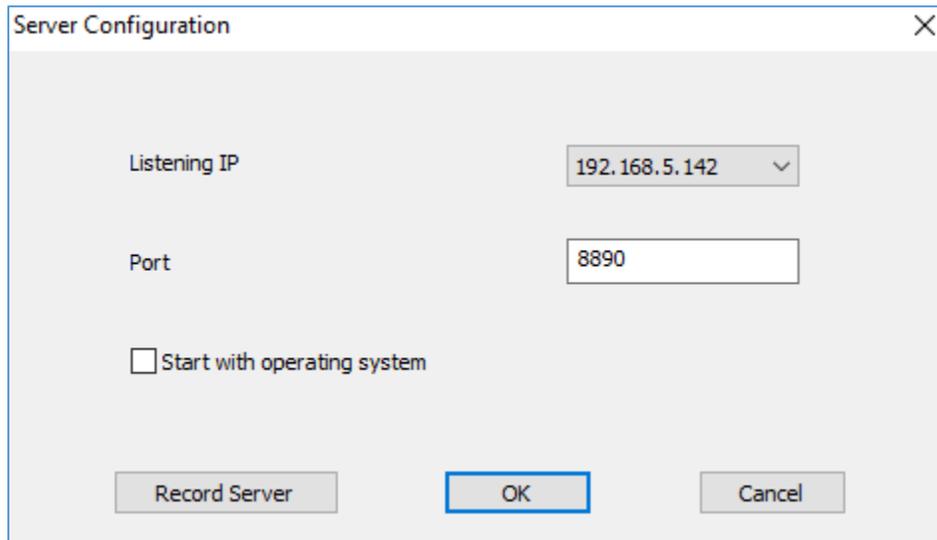

Figure 2: Server Configuration

2. **Record Server**: Start an FTP server to save pictures uploaded by the GDS3710.

3. **Exit**: Click to quit the GDS Server software.

Starting GDS Manager

The GDS Manager is the client part of the software, which will allow interaction with the GDS3710 through the GDS Server.

To start the GDS Manager follow steps below:

1. Double click on the GDS Manager and the following window will popup:

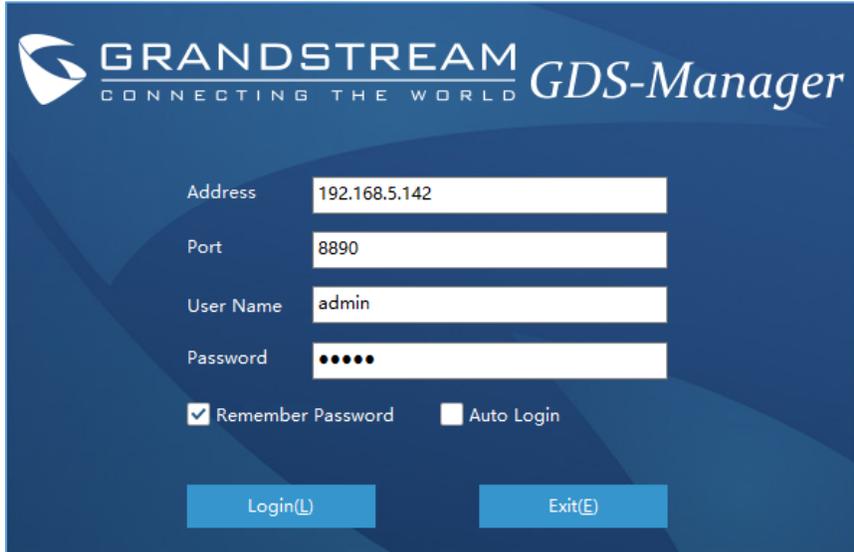

Figure 3: GDS Manager Login Page

- **Address:** Enter the IP address or domain of the GDS Server machine.

- **Port:** Enter the listening port of the GDS Server.

- **User Name:** Enter the user name to connect to the GDS Manager, by default its **admin**.

- **Password:** Enter the password to connect to the GDS Manager, by default its **admin**.

2. Click Login and the following confirmation window will popup:
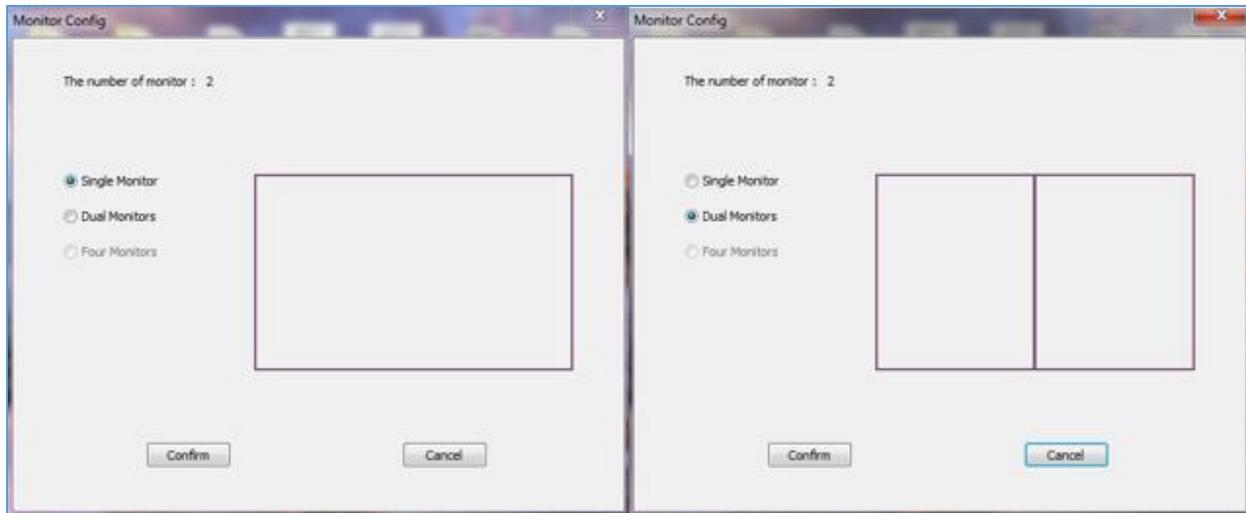

Figure 4: Monitor Configuration

- Select **Single Monitor** or **Dual Monitor** to display the GDS Manager on single screen or two screens respectively.

- Click Confirm to start the GDS Manager.

Note: GDS Manager can be connected to a GDS Server on the same LAN or a cross the WAN, enter the Public or private IP of the GDS Server on the GDS Manager to connect.

GDS MANAGER APPLICATIONS

Basic Information

Administrator

The administrator sub-menu allows the admin to change its password and/or create new users.
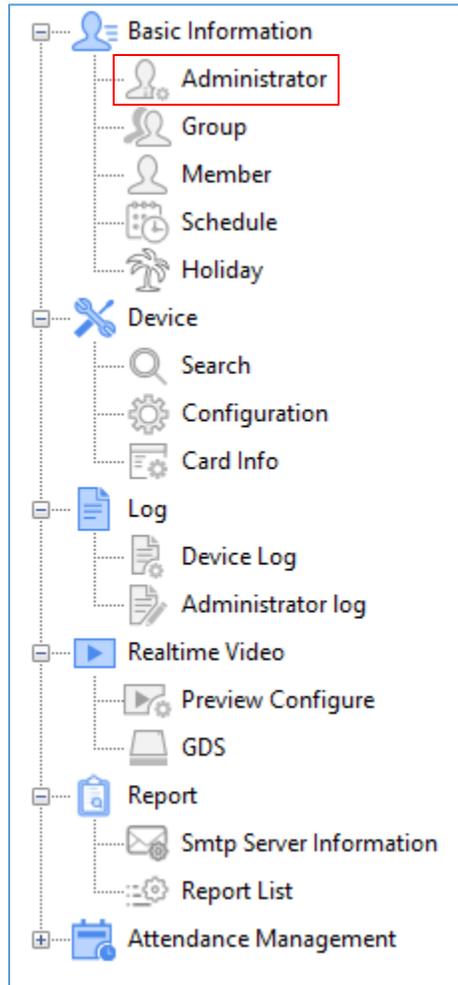

Figure 5: Administrator

Click on the "**Administrator**" icon to display the following window.
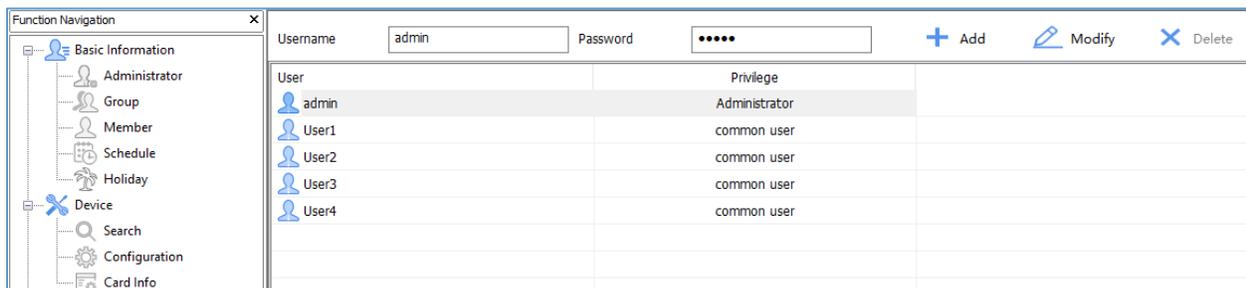

Figure 6: User Management

GDS Manager User Manual
Version 1.0.0.109

To change the admin password set the following:

- Enter a new password and click on ✎ Modify .

To create a new user, follow below steps:

1. Enter a user name.

2. Enter a password.

3. Click on + Add .

Note: Administrator will have access to all sub-menus on the GDS Manager while user account will have access to the following.
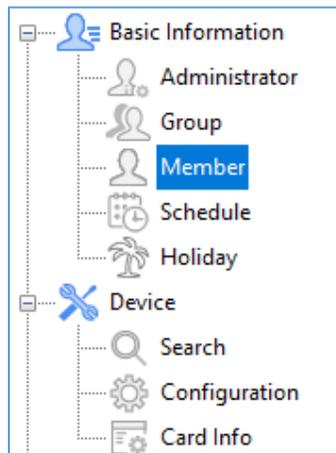

Figure 7: User Level Access

Group

Admin can create groups and sub-groups to separate users, this can be done by following those steps:

Figure 8: Groups

GDS Manager User Manual
Version 1.0.0.109
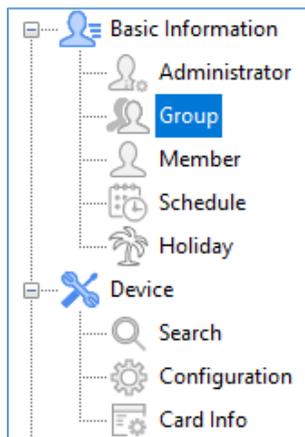

1. Click on "**Add**" as shown below.
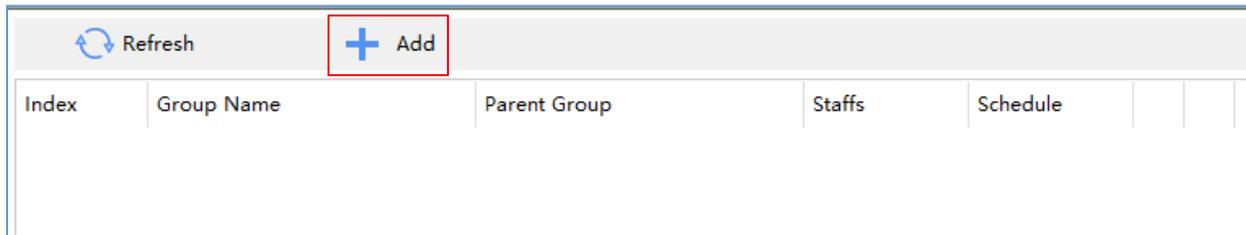

Figure 9: Add Groups

2. Enter the "**Group Name**" and "**Parent Group Name**" if parent group is needed.

Figure 10: Group Name

3. Configure the schedule time frames and click on "Confirm" to add the group.

Note: Users can create up to 50 groups.

Member

Admin can manage users from **Member** menu, he/she can add/delete/synchronize data with the GDS3710 and search for a user.
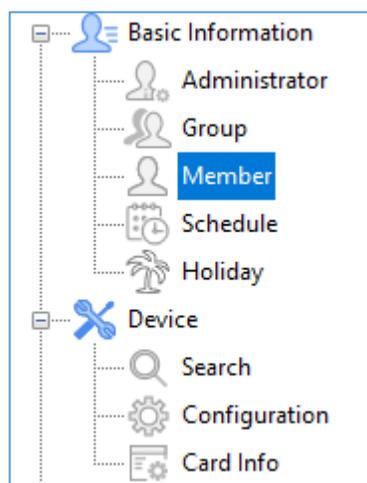

Figure 11: Member

1. Click on [Add a new Member] to add a new user, the following window will pop up to enter user's specific information.

GDS Manager User Manual
Version 1.0.0.109

Figure 12: Member Profile

Table 1: Member Profile

Field	Description
Index	Filed automatically generated by the GDS Manager indicating the number of created users.
Name	Enter the user name.
Gender	Enter the user gender, Male or Female.
ID Number	ID number is a unique number to identify a user.
Virtual Number	When dialing directly from the keypad, the GDS accept only Virtual number to identify a user, once the Virtual number is typed followed by **#** key, the Sip Number will be dialed.
Cell Phone	Enter the cell phone number of the user.
SIP Number	The SIP Number is mapped with virtual number, once the virtual number is dialed the GDS3710 will send an INVITE to the SIP Number.
Group	Enter the group where the user belongs.
Schedule	Configures the schedule time frames which will be assigned to the users for door system usage
Remark	Enter some remarks regarding the current user.

Card Number	Enter the RFID Card number (this is the number written on the RFID card).
Start Read Card	Click Start Read Card, then sweep RFID card on the USB card reader to read the number registered on the RFID card.
Card Type	Specifies the Card Type.
Clear Card Information	Click on this option to delete the card information.
Enable	Click on this filed to enable this user.
End Date	Enter date when the card will end being active.
Private Door Password	Enter the specific PIN code to unlock the door (Digits only)
Confirmation	Confirm the PIN code password
2. Select a user and click on 👤 Delete a Member to delete the selected entry.
3. Click on 🔲 Batch Add Card , the following window will pop up.
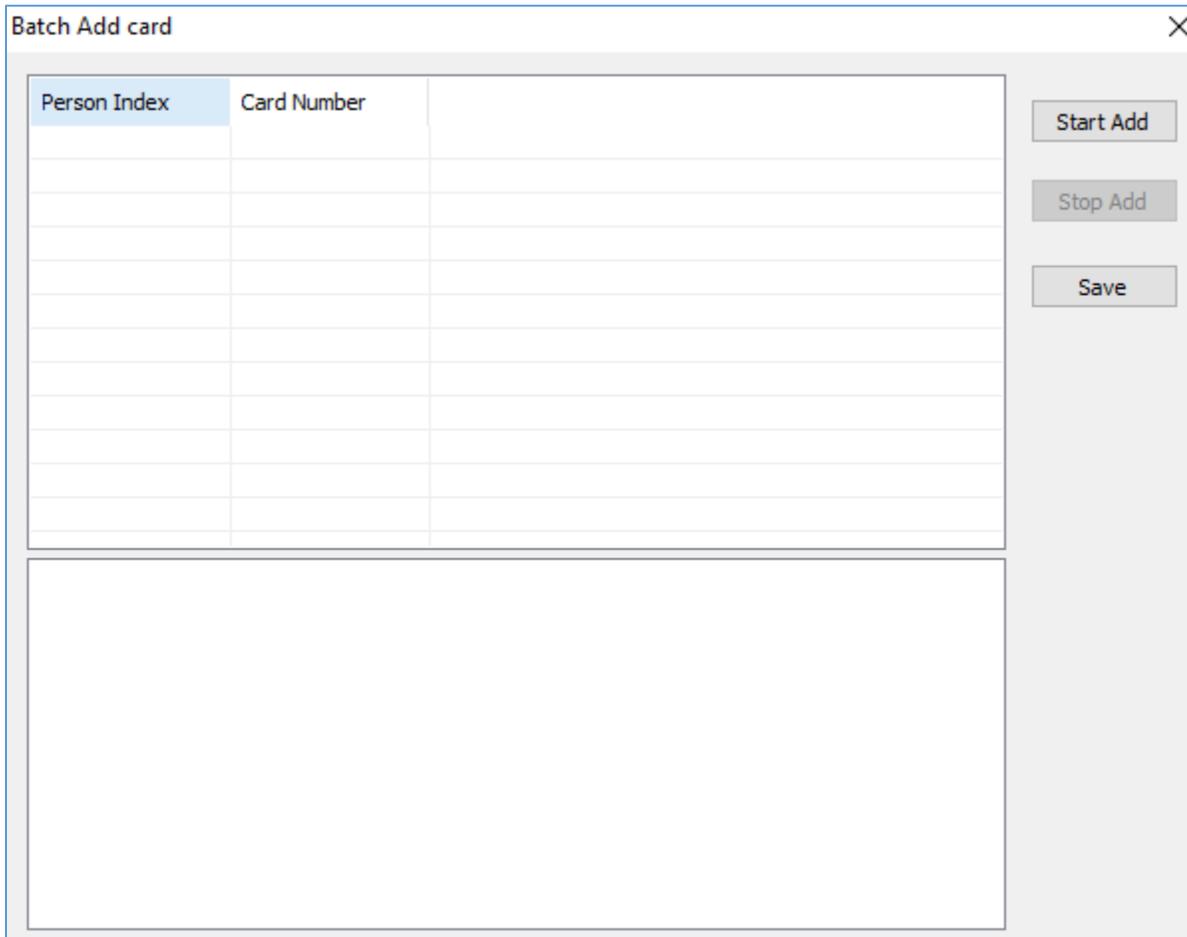

Figure 13: Batch Add Card

a. Plug the USB Card Reader that can be purchased from Grandstream as shown below.

Figure 14: USB Card Reader

b. Click on "Start Add".

c. Start swiping RFID cards, and the ("Person Index", "Card Number") fields will be incremented.

d. Click on "Stop Add" once finished adding new cards.

e. Click on "Save" to save the added cards.

4. Select a record and click on [Push To..] to copy the selected user to the GDS3710.
5. Select a batch of users, which will have the same configuration, and then click on [Batch Modify], the following window will pop up.

Figure 15: Batch Config

GDS Manager User Manual
Version 1.0.0.109

a. Check the "**Group**" checkbox and select the Group to apply to all users.

b. Check the "**Schedule**" checkbox and select the Schedule to apply to all users.

c. Check the "**Enable**" checkbox to enable the users.

d. Check the "**Valid Date**" checkbox to set a validity date for all users.

6. Select users whose configuration need to be saved, then click on [Export], the following window will pop up.
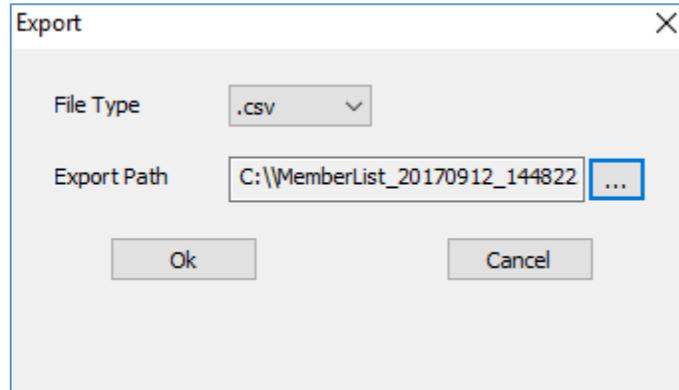

Figure 16: Export

a. Click on [...], to browse directories where to store the users' data.

b. Click "OK" to save the data.

7. Users can search for members using the search bar to filter with different methods:

- Person Index

- Name

- Group Name

- SIP Number

- Card Number

Figure 17: Search Members

Schedule

Admin can schedule time frames which will be assigned to the users for door system usage, outside the configured time intervals, the GDS will deny users' access.

Click on ![edit icon] to edit the schedules or ![details icon] for schedule details.

Figure 18: Schedule

Holiday

Admin can manage holidays which will be assigned to the users for door system usage.

Click on ✎ to edit the holidays or ≣ for holiday details.

Figure 19: Holiday

Device

This sub menu allows users to search the available GDS3710 and prepare the configurations.

Search

Click on "Search" to perform a search for all GDS3710 available in the local network, the following window will be shown.

GDS Manager User Manual
Version 1.0.0.109

Figure 20: Search

Figure 21: Search Window

1. Click "**Search**" to search for available GDSs

2. Select a GDS3710 and click on "**Add**" to start configuring selected GDS3710 from GDS Manager.

3. Click "**Exit**" to quit the search window.

Configuration

Configuration menu allow users to add manually available GDS3710 devices on the network to the GDS Manager.

1. Click on "Configuration" and the following window will pop up.

Attendance Management

The "Attendance Management" sub menu display attendance records, as well as work shift, vacation, and time frame.

GDS Manager User Manual
Version 1.0.0.109

Time Frame
Click on **+ Add** under "Timeframe" in order to set start and end work time and other time property as shown below.
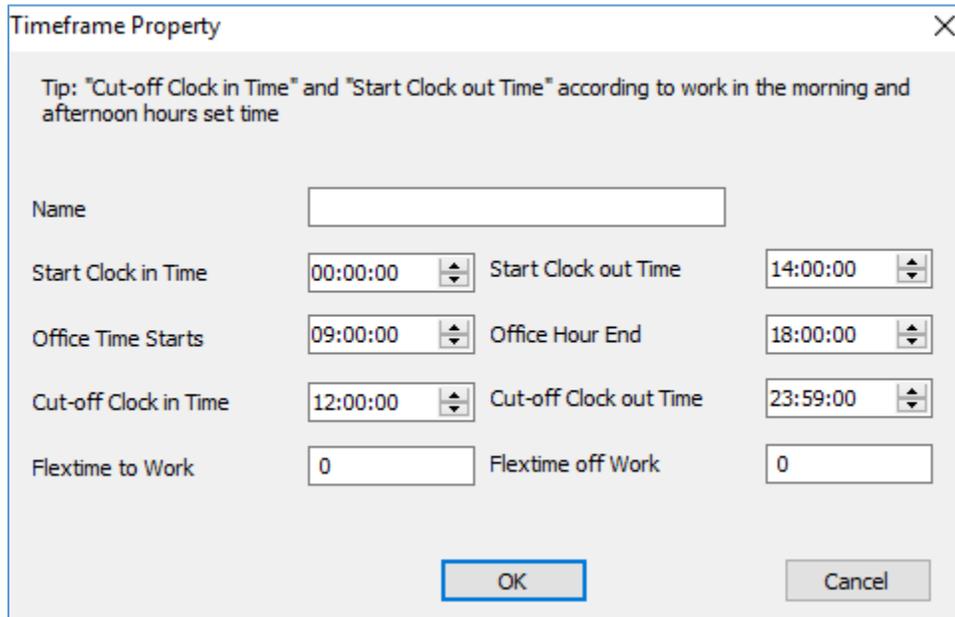

Figure 38: Timeframe Property

Table 2: Timeframe

Field	Description
Timeframe Name	Enter the Time Frame name.
Start Clock-in time	Enter time when users are allowed to start check-in.
Start Clock -out time	Enter time when users are allowed to start check-out.
Office Time Starts	Enter office start working time.
Office Hour End	Enter office end working time.
Cut-off-Clock-in Time	Enter end check-in time (no check-in will be accepted after this time).
Cut-off-Clock -out Time	Enter end check-out time (no check-out will be accepted after this time).
Flextime to Work	Enter allowed late time.
Flextime off Work	Enter allowed leaving early time.

Users can also modify or delete the timeframe by clicking on "Modified", "Deleted" respectively.

Figure 39: Timeframe

Work Shift
Click on under "Work Shift" to define work shift schedule to assign it to users. This can be done by completing the following information.

Figure 40: Work Shift Index

Users need to:

1. Set a Work Shift Name.

2. Select a Cycle Type, either weekly or monthly.

3. Select a timeframe.

4. Select days of the shift.

Work Shift Assignment

Click on under "Work Shift Assignment" to assign work shift to users as shown below.

GDS Manager User Manual
Version 1.0.0.109

Figure 41: Assign Shift to Member

1. Select from "Member" users to include for a work shift using [>] [<] arrows.

2. Select a "Start Date" and "End Date" for validity of the assignment configuration.

3. Select a work shift from the list and add it using [>] arrow.

4. Click "OK" to complete the selection.

Special Assignment

Click on **+ Add** under "Special Assignment" to add a special assignment as shown below.
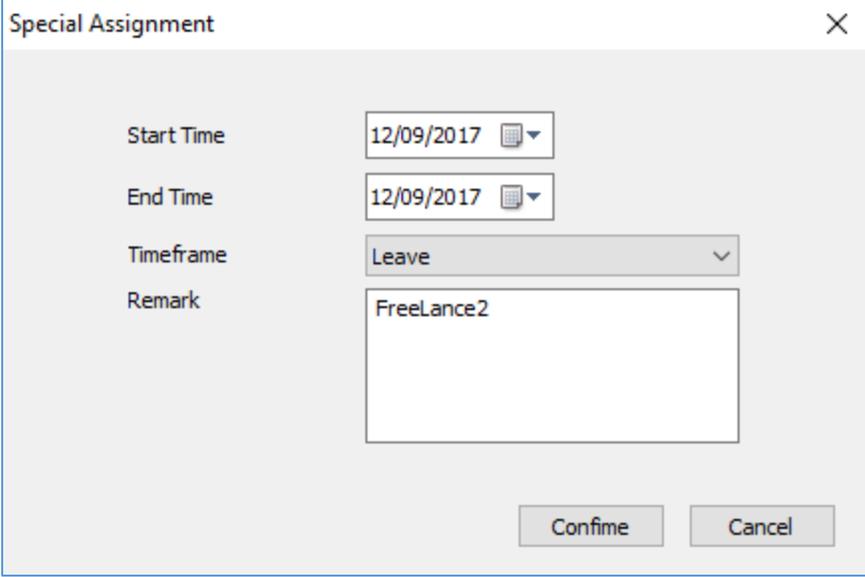

Figure 42: Special Assignment

Users need to set:

1. "Start Time" of the special assignment.

2. "End Time" of the special assignment.

3. Assign a specific "Timeframe" or set it to "Leave" to accept all periods.

4. Set a "Remark" as a reminder of the purpose if this special assignment.

Vacation Catalog
Click on to add a new vacation type to assign it to users, the following window will pop up.
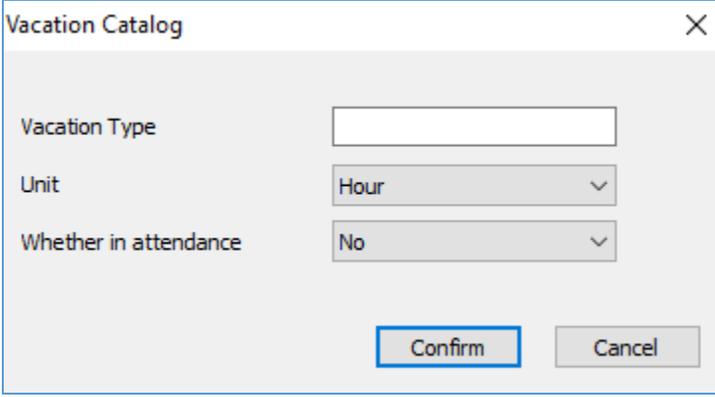

Figure 43: Vacation Type

Users need to set:

1. Enter a name on the ''Vacation Type" to identify the vacation.

2. Select the unit of the vacation on "Unit".

3. Set "Whether in attendance" to "Yes" or "No".

GDS Manager User Manual
